Innovations
in Dementia

What comes to mind when
you hear the word dementia?

What I'd like to cover today

- Things that can help people with dementia use computers
 - Adaptive technologies
 - Design
 - People
- People with dementia in these digital times
- What next? – how can we ensure people with dementia aren't left behind?

Access to digital technologies
is a right not a luxury

2011 ?

Before

If there are any points on which you require explanation or further particulars we shall be glad to furnish such additional details as may be required by telephone.

After

If you have any questions, please phone.

Disability Discrimination Act 2005

Rights in respect of:

- employment
- education
- buying or renting land or property, including making it easier for disabled people to rent property and for tenants to make disability-related adaptations
- functions of public bodies, for example issuing of licences
- access to goods, facilities and services, including larger private clubs and transport services**

1.— Meaning of “disability” and “disabled person”.

(1) Subject to the provisions of Schedule 1, a person has a disability for the purposes of this Act if he has a physical or mental impairment which has a substantial and long-term adverse effect on his ability to carry out normal day-to-day activities.

For the purposes of the Act:

substantial means neither minor nor trivial

long term means that the effect of the impairment has lasted or is likely to last for at least 12 months (there are special rules covering recurring or fluctuating conditions)

normal day-to-day activities include everyday things like eating, washing, walking and going shopping

a normal day-to-day activity must affect one of the 'capacities' listed in the Act which include mobility, manual dexterity, speech, hearing, seeing and memory

Reasonable adjustments

Under the DDA, it is unlawful for service providers to treat disabled people less favourably than other people for a reason related to their disability. Service providers now have to make 'reasonable adjustments' to the way they deliver their services so that disabled people can use them.

[Direct.gov.uk](https://www.direct.gov.uk)

The DDA also means that you have a right to information about healthcare and social services in a format that is accessible to you where it is reasonable for the service provider to provide it in that format.

Dementia is a living death for 700,000 Britons.

Observer Feb 18th 2008

Dementia is more than a vile and vicious condition. It robs people of their identity, spirit and soul like no other does.

Celebrity statement used by dementia charity to launch awareness campaign

“How dare they talk about me like that.

I might be a bit confused, but saying I have no spirit,
that I have no soul?

Shame on them. Shame on them. I’m a good person.

Sorry - I’m a bit upset”

Member of the Swindon “Forget me not group”

Rosa Parks

February 4, 1913 – October 24, 2005

What I'd like to cover today

- Things that can help people with dementia use computers
 - Adaptive technologies
 - Design
 - People
- People with dementia in these digital times
- What next? – how can we ensure people with dementia aren't left behind?

Reproduced with permission from bLaugh.com

Having dementia can dramatically reduce community networks, access to learning activities, and involvement in day-to day experiences

There is a misconception that people with dementia cannot learn new skills

Work with people with dementia and computers is its infancy.

Preaching to the converted?

People with dementia are making use of computers

- At home
- In day care
- With help and support
- At different levels
- In different ways
- For different reasons

Some of our projects

- Introducing computers and the internet as an activity in day centres
- Looking at different adaptive technologies
- Designing a new interface for the www.atdementia.org.uk website

Proving that people with dementia can engage with the internet

Getting started

“I’m not interested in computers”

“ I thought I had broken it but I see
what you have to do now”

Prompts and reminders

p

These are devices that can help act as prompts and reminders by providing visual and audible cues. They include clock calendars, medication reminders and memo minders.

Leisure

l

These are devices that can help to support and enable leisure activities. They include easy to use music players and computer aids.

Communication

c

These are devices that can help to support communication. They include easy to use telephones and mobile phones, intercoms and conversation aids.

Safety

s

These are devices that can help improve safety in the home. They include gas, smoke, extreme temperature, flood, fall and 'wandering' detectors, lighting and activity monitors.

Advanced search

You can refine your search by entering a keyword e.g. "fall", or by selecting one or more search criteria from the lists below

People with dementia at the heart of the project

- Member of the reference group
- Informing the focus of the project
- Testing
 - Language
 - Questions
 - Layout
 - Design

Making sure people are involved

- Meetings that suit individuals
- Using existing groups and supporters
- Focussing on people's strengths
- Using a variety of methods
- Adapting existing protocols

Language is important

- “Wandering”
- “Forget”
- “Sometimes/usually/often”
- Clear questions
- Exact words
- Meaningful examples

Images are important

- Illustration?
- Decoration?
- Distraction?

“It’s the wrong door!”

Using the experiences of people with dementia

- Using a calendar
- Tying keys around my neck
- The importance of PEOPLE

What next?

Other people with similar issues?

Alliances?

Technology that works with people with dementia?

Using the internet to bring people together?

Issues that came out of the workshop discussion – Out of the Box 22 June 2010

- Talk to the people with dementia you already work with
- The concept of co-design
- Problems with focus groups
- Listening – and being open to different ways of working
- Time and iteration of designs
